ERRATA

Every effort was made to make this list of bibliographies accurate; however, certain errors have crept into the text. Because of difficulties of reproduction (by mimeograph), accent signs, unlauts, lines through the letter \emptyset , etc., in many cases fail to appear on the finished pages. This in no way effects the authority of this work and we will not list them here; but a careful recheck of the finished pages brought to light some errors which we feel are important enough to warrant correction and we list them below.
